Molecular Pathogenesis of Gastrointestinal Infections (Edited by T. Wadstrom, P. H. Makela *et al.*), 235
New Perspectives on Streptococci and Streptococcal Infections (Edited by G. Orefici), 236
PCR *in situ* Hybridization. Protocols and Applications (G. J. Nuovo), 459
Progress in Medical Virology, volume 38 (Edited by J. L. Melnick), 155
Quality Control. Principles and Practice in the Microbiology Laboratory (J. J. S. Snell, I. D. Farrell and C. Roberts), 156
Review of Parasitic Zoonoses (S. J. Parija), 76
Sexually Transmitted Diseases. Advances in Host Defense Mechanisms, volume 8 (Edited by T. C. Quinn), 388
The Antimicrobial Pocket Book 1991 (G. P. Bodey, D. Milatovic and I. Braveny), 236
Viral Hepatitis in China: Problems and Control Strategies. Monographs in Virology, volume 19 (Edited by Y.-M. Wen, Z.-Y. Xu and J. L. Melnick), 74
Viral Warts. Biology and Treatment, 2nd edition (M. H. Bunney, C. Benton and H. A. Cubie), 308
Virological Aspects of the Safety of Biological Products. Developments in Biological Standardization, volume 75 (Edited by F. Horaud, F. Brown), 458
Bordetella pertussis
adenylate cyclase gene, 140
detection in clinical swabs, 140
Brain abscess, 187
Breast feeding, and HIV infection, 1

Campylobacters
antigens, 3
C. coli in mixed infections, 3
C. jejuni, adaptation to aerobic metabolism, 145
C. jejuni in mixed infections, 3
C. jejuni, pathogenicity, 293, 316
C. jejuni, virulence factors, 293
mixed infections with Lior-serotype variants, 3
Catheters
CAPD, studies of surface microrugosity, 411
Cefdinir
stability to extended-spectrum plasmid-mediated β-lactamases, 114
Cell culture
herpes simplex viruses in Vero cells, 262
Charcoal
adsorbance of staphylococcal enterotoxin, 354
Chemiluminescence, 13, 191, 209
Chicken model
virulence of *C. jejuni* for chick embryos, 293
virulence of *Salmonella* Enteritidis, 171
Chlamydia
C. pneumoniae, morphology, 418
C. psittaci, morphology, 418
C. trachomatis, detection by PCR, 426
C. trachomatis, morphology, 418
C. trachomatis, persistence in human monocytes, 278
Chromatography
anion-exchange, 69
benzoylated DEAE-cellulose, 442
fast liquid protein, 69
gas-liquid, 371
thryoglobulin affinity, 69
Clindamycin
resistance to colonisation by *C. difficile*, 103
Clostridia
C. difficile, characterisation by PCR, 109
C. difficile, characterisation of intracellular toxin A, 69
C. difficile, detection of enterotoxin gene, 384
C. difficile, non-production of toxin A, 434
C. difficile, resistance to colonisation, 103
C. difficile, serogroup F strains, 434
C. difficile, toxin B, 434
Colitis, *C. jejuni* infection, 316
Cryptosporidia, HIV-associated infection, 1
CT (computed tomography) scanning, 187
Cystic fibrosis, 29
Cytokines, 237, 395
Cytomegalovirus, HIV-associated infection, 1
Cytotoxic activity, of *C. difficile*, 69, 109, 434

Dental caries, 401
Dental plaque, 406
Dento-alveolar abscess, 151
Desferrioxamine, 389, 442
Diarrhoea
C. jejuni infection, 316
enteropathogenic *E. coli* infection, 222
enterovirulent *E. coli* infection, 87
and HIV infection, 1
Dihydrofolate reductase, 250, 256
DNA
analysis of mixed retroviral infections by PCR, 328
detection of *C. difficile* enterotoxin gene by PCR, 384
detection of *C. trachomatis* by PCR, 426
Gen-probe kit, 183
hybridisation, 87, 140, 270, 278
probe, in detection of *M. pneumoniae*, 166
probe for multi-resistance gene cluster of *S. aureus*, 270
random amplified polymorphic DNA (RAPD) analysis, 322
restriction analysis, 6, 29, 191, 366
T. gondii, detection by PCR, 38

Echinococcus granulosus
detection of antigen in serum, 391
Elastase, of *P. aeruginosa*, 79
Electronmicroscopy
effect of sulphadiazine and trimethoprim on *E. cloacae*, 64
flagellar sheath of *H. pylori*, 371
morphology of *C. pneumoniae*, 418
scanning, 411, 418
surface microrugosity of CAPD catheters, 411
transmission, 418
Electrophoresis
contour-clamped homogeneous electric fields (CHEF), 366
field inversion gel, 29
multilocus enzyme, 122, 129
pulsed-field gel, 29, 203, 270, 366
see also PAGE: SDS–PAGE
ELISA
antibodies against *P. aeruginosa*, 79
detection of toxin A of *C. difficile*, 109
detection of toxoplasma-specific IgA, 286
in mixed retroviral infection, 328
screening for *P. gingivalis* antigens, 406
screening for *T. denticola* antigens, 406
Endotoxin, in septicaemia, 237
Enteritis
cryptosporidial, 1
HIV-associated, 1
Enterobacter cloacae
effect of trimethoprim and sulphadiazine, 64
Enterococci
clearance from blood, 337
E. faecalis, interaction with mononuclear phagocytes, 345
E. faecalis, oral infectivity, 345
Enteropathy, and HIV, 1
Enterotoxins
of *Aeromonas* spp., 49, 227
detection of *C. difficile* enterotoxin gene, 384
removal from plasma by adsorbents, 354
staphylococcal enterotoxin A, 354
toxin A of *C. difficile*, 69
Enteroviruses
HIV-associated infection, 1
Enzyme immunoassay
determination of chlamydial lipopolysaccharide, 278
Epidemiology
methicillin-resistant *S. aureus*, 270, 309
N. meningitidis, 19
P. aeruginosa in cystic fibrosis, 29
Escherichia coli
clearance from blood, 337
in diarrhoeal infection, 87, 222
dihydrofolate reductase production, 250, 256

enteropathogenic (EPEC), 222
enterovirulent (EVEC), 87
interaction with mononuclear phagocytes, 345
intra-abdominal abscess formation, 13, 454
iron regulation, 389
mixed infection with *B. fragilis*, 13, 454
oral infectivity, 345
osmo-remedial variants, 216
outer-membrane proteins, 216
plasmids, 250, 256
trimethoprim resistance, 250, 256
virulence, 222
Exotoxins
exotoxin A of *P. aeruginosa*, 79

Faeces
detection of *C. difficile* enterotoxin gene, 384
enterovirulent *E. coli* infection, 87
mixed campylobacter infections with Lior-serotype variants, 3
Fibrin
staphylococcal colonisation of thrombi, 90
Fibronectin, and staphylococcal adherence, 90, 96
Flagella
of *B. piliformis*, 177
of *H. pylori*, 371
Fungi
inhibition of β-adrenergic binding, 44
Fusarium sp., inhibition of β-adrenergic binding, 44
Fusobacterium nucleatum
in dento-alveolar abscess, 151

Ganciclovir
and cytomegalovirus infection, 1
Gen-probe kit, 183
Genetic characterisation
avian-adapted salmonellae, 129
L. monocytogenes, 122
methicillin-resistant *S. aureus*, 203
Genital infection, with *M. pulmonis*, 160
Glucosyltransferase
streptococcal, and surfactants, 54
Glycosaminoglycans, binding by *H. pylori*, 240
Gram's stain
bacteriology of brain abscess, 187

Haemagglutinating activity
of *Aeromonas* spp., 49
toxin A of *C. difficile*, 69
Haemolytic activity
β-haemolysin of *Aeromonas* spp., 227
Haemophilus influenzae
immunoblot analysis, 378
outer-membrane protein analysis, 378
vaccine, 77
Hamster model
resistance to colonisation by *C. difficile*, 103
Helicobacter pylori
binding of heparan sulphate, 240
biotyping, 6
characterisation of phage, 245
flagellar sheath, 371
metronidazole-resistant, 6
molecular fingerprinting, 6
opsonic requirements, 209
Heparan sulphate, binding by *H. pylori*, 240
Herpes simplex viruses
antiviral properties of seed extract of *P. pinnata*, 262
latency in rat dorsal root ganglia, 265
HIV (human immunodeficiency virus)
enteropathy, 1
HIV-1 and HIV-2 in mixed retroviral infection, 328
and the intestine, 1
HTLV-I (human T-cell leukaemia virus type-I)
in mixed retroviral infection, 328
Hybridisation of DNA
analysis of methicillin-resistant *S. aureus* outbreak, 270
detection of bordetellae in clinical swabs, 140
determination of chlamydial ribosomal RNA, 278
probe assay of *E. coli*, 87
Hydatid disease, 391
Hydrophobicity
effects on clearance of bacteria from blood, 337
of *S. lugdunensis*, 96

Ileal loops
enterotoxigenicity of *Aeromonas* spp., 49
enterotoxigenicity of *C. difficile* toxin A, 69
pathogenicity of *C. jejuni*, 316
Immune response
effect of immunomodulating agent on intra-abdominal abscess formation, 454
and intestinal tract, in HIV infection, 1
role of iron in infection, 389
to *H. pylori*, 209
Immunisation
against *H. influenzae* type b, 77
against *N. meningitidis*, 77
rats against *P. aeruginosa*, 79
Immuno-assay
enzyme, determination of chlamydial LPS, 278
microparticle capture enzyme (MEIA), 34
toxoplasma-specific IgM, 34
Immunoblotting
class 1 proteins of *N. meningitidis*, 23
proteins of *Y. enterocolitica*, 118
subtyping of *H. influenzae*, 378
Immunofluorescence
chlamydial antigens, 278
diagnosis of *P. carinii* pneumonia, 449
Immunoglobulins
effects on clearance of bacteria from blood, 337
IgG response to *P. aeruginosa* vaccines, 79
toxoplasma-specific IgA, 286
toxoplasma-specific IgM, 34
Immunohistological studies
herpes simplex virus latency, 265
Immunomodulating agent
effects on intra-abdominal abscess formation, 454
RU 41.740, 454
Immunosorbent agglutination assay (ISAGA)
detection of toxoplasma-specific IgA, 286
Immunotherapy, of sepsis, 237
Inflammatory response, to *A. viscosus*, 395
Integrons, role in antibiotic resistance, 157
Interleukins, 237, 395
Iron
and infection, 389
regulation by *N. meningitidis*, 389, 442
Isospora belli, HIV-associated infection, 1

Klebsiella pneumoniae
glycoprotein extract, as immunomodulating agent, 454

β-Lactamases
and stability of cefdinir, 114
Lactobacillus casei,
lethal photosensitisation, 401
Lactoferrin, 389
Laser
lethal photosensitisation of cariogenic bacteria, 401
scanning microscopy of peritoneal catheter surfaces, 411
Lectins
effects on clearance of bacteria from blood, 377
Legionella spp.
diagnostic efficacy of DNA probe, 183
Legionnaire's disease, 183
Lipo-oligosaccharide (LOS), of *N. meningitidis*, 77
Lipopolysaccharide (LPS), of *C. trachomatis*, 278
Listeria
L. monocytogenes, epidemiology, 122
L. monocytogenes, genetic characterisation, 122

L. monocytogenes, interaction with mononuclear phagocytes, 345
L. monocytogenes, oral infectivity, 345
L. monocytogenes, typing method, 322
L. monocytogenes, virulence, 122
typing by random amplified polymorphic DNA analysis, 322
Lymphocytes, in HIV infection, 1
Lysate, from cell walls of *A. viscosus*, 395

Macrophages
HIV-infected, 1
response to cell-wall lysate of *A. viscosus*, 395
Mannose
effects on clearance of bacteria from blood, 337
Methicillin resistance
of *S. aureus*, 203, 270, 309
Metronidazole resistance, of *H. pylori*, 6
Microparticle capture enzyme immuno-assay (MEIA), 34
Monoclonal antibodies
against *B. piliformis*, 177
against *N. meningitidis*, 23
Monocytes
persistence of *C. trachomatis* in, 278
Mouse model
clearance of bacteria from blood, 337
genital infection with *M. pulmonis*, 160
intra-abdominal abscess, 454
lethality of *C. difficile* toxin A, 69
virulence of *Salmonella* Enteritidis, 171
Mupirocin, and methicillin-resistant *S. aureus*, 309
Mycobacteria, in brain abscess, 187
Mycoplasmas
M. pneumoniae, detection by PCR, 166
M. pulmonis, effects of progesterone and oestrogen on infection, 160

Neisseria
N. gonorrhoeae, genotypic characterisation, 366
N. meningitidis, epidemiological studies, 19
N. meningitidis, alteration of transfer RNA, 442
N. meningitidis, antigenic expression, 19, 23
N. meningitidis, iron-regulation, 389, 442
N. meningitidis, vaccines, 77

Oestrogen, and genital infection with *M. pulmonis*, 160
Opacity factor, production by group A streptococci, 311
Opsonisation
group B streptococci, 191
H. pylori, 209
Opsonophagocytosis, of group B streptococci, 191
Oral infectivity
and bacterial interactions with mononuclear phagocytes, 345
Osmo-remedial strains, of *E. coli*, 216

PAGE, toxin A of *C. difficile*, 69
Penicillin tolerance, of *S. pyogenes*, 197
Periodontitis, 406
PerioScan test, 406
Peritoneal cells, bactericidal activity in abscess model, 13
Phage
of *H. pylori*, 245
and methicillin-resistant *S. aureus*, 309
Phagocytes, mononuclear
bacterial interactions and oral infectivity, 345
Phagocytosis
bacterial strains from dento-alveolar abscess by PMNLs, 151
lectinophagocytosis, 337
Photosensitisation, of cariogenic bacteria, 401
Plasmids
of *E. coli*, and β-lactamases, 114
profiles, of *H. pylori*, 6
profiles, of *S. aureus*, 203
role in antibiotic resistance, 157
of *Salmonella* Enteritidis, 171
trimethoprim resistance in *E. coli*, 250, 256
of *Y. enterocolitica*, 118
Pneumocystis carinii pneumonia, diagnosis, 449
Polymerase chain reaction
analysis of mixed retroviral infections, 328
characterisation of *C. difficile*, 109
detection of bordetellae in clinical swabs, 140
detection of *C. difficile* enterotoxin gene, 384
detection of *C. trachomatis*, 426
detection of *M. pneumoniae*, 166
detection of *T. gondii*, 38, 360
diagnosis of *P. carinii* pneumonia, 449
meningococcal class 1 proteins, 23
random amplified polymorphic DNA analysis, 322
toxins of *C. difficile*, 434
Polymorphonuclear leucocytes (PMNLs)
opsonophagocytosis of group B streptococci, 191
phagocytosis of bacterial strains from dento-alveolar abscess, 151
phagocytosis of *H. pylori*, 209
Polysaccharides
H. influenzae, in vaccines, 77
meningococcal, in vaccines, 77
Pongamia pinnata, antiviral properties, 262
Porphyromonas gingivalis
prevalence in dental plaque, 406
Prevotella spp., in dento-alveolar abscess, 151
Progesterone
and genital infection with *M. pulmonis*, 160
Protein
M-protein typing of streptococci, 311
meningococcal class 1, 23
outer-membrane, of *C. trachomatis*, 278
outer-membrane, of *E. coli*, 216
outer-membrane, of *H. influenzae*, 378
outer-membrane, of *N. meningitidis*, 77
outer-membrane, of *P. aeruginosa*, 79
outer-membrane, of *Y. enterocolitica*, 118
plasmid-encoded, and virulence of *Y. enterocolitica*, 118
protein A of *S. aureus*, 391
serum and tissue protein binding by *S. lugdunensis*, 96
synthetic peptide test, 328
whole-cell analysis of *H. pylori*, 6
Proteus spp.
in brain abscess, 187
P. mirabilis, interaction with mononuclear phagocytes, 345
P. mirabilis, oral infectivity, 345
Pseudomonas aeruginosa
clearance from blood, 337
in cystic fibrosis, 29
elastase, 79
epidemiology of pulmonary colonisation, 29
exotoxin A, 79
outer-membrane protein F, 79
vaccines, 79
Pulmonary infection, by *P. aeruginosa*, 29, 79

Radiolabelling, 209, 354, 411
RAPD (random amplified polymorphic DNA) analysis
typing of *Listeria* spp., 322
Rat model
clearance and tissue distribution of staphylococcal enterotoxin A, 354
herpes simplex virus infection, 265
intra-abdominal abscesses, 13
protective efficacy of vaccines against *P. aeruginosa*, 79
Restriction analysis
chromosomal DNA of group B streptococci, 191
genotypic characterisation of *N. gonorrhoeae*, 366
P. aeruginosa, 29
typing of *H. pylori*, 6
Restriction fragment length polymorphisms (RFLPs)
analysis of MRSA outbreak, 270
Retroviral infections, mixed, 328
Ribotyping, *H. pylori*, 6
RNA
alteration of transfer RNA of *N. meningitidis*, 442
ribosomal, chlamydial, intracellular persistence of, 278

Salmonellae
bacteraemia, 1
Enteritidis, plasmid, 171
Enteritidis, virulence, 171
evolutionary origin and radiation, 129
Gallinarum, 129
HIV-associated infection, 1
interaction with mononuclear phagocytes, 345
Pullorum, 129
S. typhimurium, oral infectivity, 345
SDS–PAGE
Aeromonas spp. enterotoxin, 227
flagellar sheath of *H. pylori*, 371
Septic shock, 237
Septicaemia
group B streptococci, 191
immunotherapy, 237
removal of enterotoxin from blood, 354
staphylococcal, 354
Serogrouping, *N. meningitidis*, 19
Serology, mixed retroviral infection, 328
Serotyping
group A streptococci, 311
mixed campylobacter infections, 3
N. meningitidis, 19
Serum
detection of hydatid antigen, 391
opsonisation of group B streptococci, 191
opsonisation of *H. pylori*, 209
protein binding by *S. lugdunensis*, 96
sensitivity of *Aeromonas* spp., 49
Siderophore production, 389
Slim disease, 1
Southern blotting, 140
Staphylococci
adherence, 90
coagulase-negative, 90, 96
enterotoxin A, 354
S. aureus, adherence, 90
S. aureus, in brain abscess, 187
S. aureus, in co-agglutination test for hydatid disease, 391
S. aureus, epidemiology, 309
S. aureus, methicillin-resistant, 203, 270, 309
S. aureus, multi-resistant, 270, 309
S. aureus, plasmids, 203
S. aureus, protein A, 391
S. aureus, virulence factors, 309
S. epidermidis, adherence, 90, 411
S. lugdunensis, cell surface properties, 96
S. lugdunensis, serum and tissue protein binding, 96
S. lugdunensis, virulence, 96
septicaemia, 354
Streptococci
β-haemolytic, 187
in brain abscess, 187
in dento-alveolar abscess, 151
group A, M-protein typing, 311
group A, opacity factor production, 311
group A, survival in dried human blood, 61
group A, T-agglutination typing, 311
group A, virulence, 61
group B, opsonophagocytosis, 191
S. milleri, phagocytosis by PMNLs, 151
S. mutans, adherence, 54
S. mutans, effects of surfactants, 54
S. mutans, lethal photosensitisation, 401
S. pyogenes, penicillin tolerance, 197
S. sobrinus, adherence, 54
S. sobrinus, effects of surfactants, 54
S. sobrinus, lethal photosensitisation, 401
Sulphadiazine, effect on *E. cloacae*, 64
Surfactants
effects on growth and adherence of mutans streptococci, 54

Thymine starvation, and trimethoprim resistance, 250, 256
Toluidine blue O, as photosensitising agent, 401
Toxins
adenylate cyclase toxin of *B. pertussis*, 140
toxin A of *C. difficile*, 69, 109
toxin B of *C. difficile*, 109, 434
see also Cytotoxic activity: Endotoxin: Enterotoxins: Exotoxins
Toxoplasma gondii
in AIDS patients, 286
detection by PCR, 38, 360
detection of specific IgA, 286
measurement of specific IgM, 34
Transferrin, 389, 442
Transposons, role in antibiotic resistance, 157
Treponema denticola
prevalence in dental plaque, 406
Trimethoprim
effect on *E. cloacae*, 64
resistance, and dihydrofolate reductase, 250, 256
Tumour necrosis factor (TNF), 237, 395

Vaccines
against *H. influenzae* type b, 77
against *P. aeruginosa*, 79
conjugate, 77
meningococcal, 77
Vibriobactin, 389
Vibrios
V. anguillarum, role of iron in infection, 389
V. cholerae, role of iron in infection, 389
Virulence factors
Aeromonas spp., 227
C. jejuni, 293
E. coli, 222
L. monocytogenes, 122
role of iron in infection, 389
S. aureus, 309
S. lugdunensis, 96
Salmonella Enteritidis, 171
streptococci, 61
Y. enterocolitica, 118

Western blotting, 328
Whooping cough, 140

Yersinia enterocolitica
immunological analysis of plasmid-encoded proteins, 118
role of iron in infection, 389
virulence factors, 118
